# Affordability Now!

Many of us are finding it harder and harder to afford to live in House District 3, especially young adults and retired people on a fixed income. **We need...**

1.

**Lower Residential Property Taxes.** Residential property owners are subsidizing lower property taxes paid by large corporations. This needs to be reversed, along with extending tax circuit breakers and adding a homestead exemption for those who make less than a certain amount of money.

2.

**Affordable Housing.** Local solutions for affordable housing are best. We must empower local communities to find these solutions by restoring local control over zoning and growth management rather than mandates from the Legislature.

3.

**Sustainable Economy.** Our small businesses in HD3 are fueled by outdoor recreation, so we need to protect our environment and public lands. Public education, as well as hospital and medical services also contribute to our economy. We need to ensure that our teachers and nurses, and other workers, are paid a livable wage so that they can live in the district where they work.

**Elect DEBO POWERS,** an experienced leader who will work hard every day to find solutions to the problem of affordability. [www.powersforthepeople.us](http://www.powersforthepeople.us)
